

**PREKAM**

# TURN CE COMPLEXITY INTO **STRUCTURED** **COMPLIANCE**

Transform complex CE regulations into a clear, step-by-step engineering workflow — enabling faster compliance, reduced risk, and full regulatory control.

Structured CE compliance software  
for Industrial Machinery Manufacturers

# CE REGULATIONS ARE **COMPLEX.**

## Your Compliance Should Be Structured.

CE regulations are detailed and technically demanding. Applying them consistently across engineering projects requires clarity, structure and traceability.

**CE Certifier transforms regulatory requirements into a clear, step-by-step compliance workflow.**

## A CLEAR **6-STEP** CE CERTIFICATION WORKFLOW

**From initial project setup to final Declaration of Conformity — fully structured and audit-ready.**

# MORE THAN A TOOL. A COMPLIANCE ADVANTAGE.

## INTEGRATED REGULATORY KNOWLEDGE

Regulatory knowledge integrated directly into your workflow: directives, standards, and continuous updates.

> Always up-to-date.

## STRUCTURED COMPLIANCE LINKING

Hazards, risk evaluations, and standards are automatically connected.

> No fragmented compliance.

## FULL REGULATORY COVERAGE

Manage complex machinery regulations and directives, including MR, MD, ATEX, PED, LVD, EMC, RoHS, CRA.

> All in one structured system.

## STRUCTURED & COLLABORATIVE

Multi-user access, transparent reviews, audit-ready exports, and secure centralized storage.

> Clear responsibilities and accountability.

**Machinery Regulation Ready (EU 2023/1230)**

# DESIGNED FOR INDUSTRIAL MACHINERY MANUFACTURERS.

**Built for complex and highly regulated industrial environments:**

- ✓ Food & Packaging Machinery
- ✓ Manufacturing & Production Lines
- ✓ Mining & Heavy Equipment
- ✓ Forestry & Wood-Processing Machinery

## REAL EXPERTISE. TRUSTED RESULTS.

For over 35 years, PREKAM has supported industrial companies in machinery safety and CE compliance.

CE Certifier was born from real machinery risk assessment and refined through continuous use in industrial environments.

### Today it is:

- Developed by machinery safety experts
- Shaped by real industrial users
- Continuously improved through field experience
